

Overview

The new Fitness Audio MT-U8 8-channel mini Transmitter can be attached to the frame of our microphones, or long cable-mounted as per usual - the choice is yours! The Mini-Tx is powered by one AAA battery; best used with either Alkaline, Lithium or NiMH rechargeable batteries.

The circuit board is coated with the anti-corrosion lacquer that's exclusive to Fitness Audio; molded rubber O-rings seal the two halves and the cover and there are no exposed switches so the transmitter is sealed against sweat.

Features

- Your choice of headset for system - Aeromic, Cyclemic, or EMic
- Your choice of antenna wire length for: On the Head, Armband, or Waist Pouch
- 8 channel frequency agile UHF system
- Coated circuit board - to protect against sweat damage
- Sealed single push button 'ON/OFF' switch on the transmitter
- Single AAA battery transmitter operation for 5 hours
- Tone coded transmission - eliminates spurious emissions like 'on/off' pop noises and the need for a 'mic mute' switch
- New Sweat Resistant Connector
- Many UHF frequency groups available according to region - Partners with the Fitness Audio U-Series receivers
